

Tuning Your Drones

5 LESSONS · ALL LEVELS

Welcome to Tuning Your Drones. I built this course to give you exactly this: a focused deep-dive on the skill every tune-up depends on: get your three drones locked in with each other and with low A, fast and by ear.

- ☐ **01 How to Master Steady Blowing**
Lock in steady blowing first — drones can't hold a true pitch if your air pressure wavers.
July 16, 2024 · 1h 9m · Tone & Tuning

- ☐ **02 Drone Tuning Tips**
Learn the core goal: three drones in tune with each other and with low A as the reference.
September 20, 2022 · 1h 4m · Tone & Tuning

- ☐ **03 Hands-On Drone Tuning Workshop: Get In Tune Fast**
Work the hands-on tuning sequence step by step: middle tenor off, bass to the outside tenor, then dial in the rest.
November 13, 2025 · 47m · Tone & Tuning

- ☐ **04 Using the InTune Mic**
Use the InTune Mic to catch what your ears miss and confirm you're actually in tune.
February 1, 2023 · 1h 7m · Tone & Tuning

- ☐ **05 Fall Tune-Up**
Run a seasonal leak and joint check, since a loose joint will undo even a perfect drone tuning.
October 23, 2023 · 1h 10m · Tone & Tuning
